

REMARKS

Claims 1-7 and 12-16 are pending in the application, with claims 1, 2 and 7 being independent and claims 12-15 being withdrawn from consideration. Claims 1 and 2 have been amended as suggested by the Examiner in the Examiner's objections to those claims. Claim 7 has been amended to recite that the writing circuit is set to a wait state after the second data is written to the memory for writing, and that writing of third video data to the memory for writing is started based on a pulse having a constant period received after changing selection of the selector circuit. These features corresponds to the features of claims 2 and 16 that are indicated to be the basis for the Examiner's allowance of those claims. As such, the amendments are not believed to introduce new matter or to raise new issues, and, accordingly, are believed to be appropriate despite the final rejection.

Applicant acknowledges with appreciation the Examiner's allowance of claims 1-3, 5, 6 and 16.

As noted above, claims 1 and 2 have been amended in response to the Examiner's objections. These amendments are believed to address the Examiner's concerns.

Claim 7 has been rejected as being anticipated by Aoki (U.S. Patent No. 6,225,990). Applicant requests reconsideration and withdrawal of this rejection in view of the amendment of claim 7 to recite features acknowledged by the Examiner to be missing from Aoki.

Applicant submits that all claims are in condition for allowance.
